Operations

The New Jersey Forest Fire Service protects more than 3.2 million acres of public and private wildlands throughout New Jersey. The New Jersey Forest Fire Service is in the Division of Parks and Forestry, in the Department of Environmental Protection. Approximately 89 full-time firefighters (Forest Fire Wardens), Forest Fire Observers, Fleet Repair Personnel, Office Staff, and other support are employed by the agency. In addition, 1200 part-time/paid per-calls fire fighters are available. In 2015 many full-time personnel have retired, and many of the Forest Fire Observers positions have not yet been filled.

The State is divided into three geographical Divisions. Each division; North (A), Central (B), and South (C), are to have a Division Warden and two Assistant Division Wardens. Each Division is divided into Sections of about 100,000 acres. Each section is administered by a full-time Section Forest Fire Warden who is equipped with an off road wildland engine. Each Section is then divided into districts, which are about 15,000 acres. Each district has a part-time District Forest Fire Warden. Some District Wardens are assigned a fire apparatus, other do not operate apparatus. Each District has at least one Deputy Forest Fire Warden to assist the District Wardens. The Fire Apparatus that are assigned out in the field are usually kept at the warden's residences, others are kept at state facilities like parks, and others are kept in municipal fire stations. Due to retirements, twelve forest fire lookout towers do not have full-time observers; one section does not have a section warden. In these areas, the section is being covered by other section wardens. Each division office as well as the state HQ has vacant Assistant or Division Wardens positions. Division B and Division C shops each have vacant mechanics positions.

In addition to the state Forest Fire Service, several other state agencies and municipal fire companies/departments have cooperator units. These trucks are usually 4x4 or 6x6 military, or other federal agency vehicles, that were obtained from the Federal Excess Property Program, in which the Federal Government owns the vehicles, and are "on Loan" to either the state or the municipal fire departments. All co-op units come under control of the NJ Forest Fire Service. Currently over 20 such units are in service throughout NJ, including 3 state parks, and 1 State Wildlife Management Area. In addition, the New Jersey Forest Fire Service operates over 100 federal excess vehicles and machines that are in front line service.

Dispatch is done by the nearest Forest Fire Lookout Tower, the Division Headquarters, then Trenton DEP Dispatch, and or various County Communication Centers. Camden, Cape May, Cumberland, Burlington, Hunterdon, Gloucester, Mercer,

Monmouth, Morris, Ocean, Somerset, and Warren Counties all have county wide fire communications centers.

The lookout towers each have an alidade, which is a compass like plotting table which will give a degree reading, for plotting on a map when the observer notices smoke from a fire. The fire location is known by triangulation with the help of readings from other lookout towers. The lookout towers then dispatch local forest fire units to the fire. Towers are on duty when ever the woods are dry enough to burn, especially in the March-May, and October – November fire seasons. Towers are on duty 9-5 in the winter months, and 6-10 in the spring and summer. Today 21 towers are in-service through out New Jersey. After hours, a Division Duty Officer, DEP. Dispatch, county communications, or local dispatcher will contact forest fire wardens by phone, or radio for responses.

Depending on the time of day, season of the year, the location, current weather conditions, or fire behavior, will result in which and how many resources will be dispatch to a wildfire. If the observer in the lookout towers observes dangerous fire behavior, additional units may be dispatched immediately. In the spring fire season, it would not be uncommon to dispatch several off-road wildland engines (type 6x), a SEAT or single engine air tanker, and possibly even a tractor-plow/dozer. Other times of the year when the fire danger is low, only one unit may be dispatched. The Division offices may also dispatch units to incidents, especially on larger incidents, which require resources from through out the division, or even from the other divisions. The Trenton office may coordinate division resources for assignments to other divisions.

Usually helicopters and heavy equipment (large dozers ECT), are not dispatched on the initial dispatch, except in remote locations where access is difficult and or if early recon form the aircraft is needed to find the location of fire.

Fire apparatus consists of 100 Initial attack off-road wildland engines, most of the trucks ninety eight (98) of them are type 6x engines (not including two type 6x spare engines)., The other two are type 7 x. All but six are equipped with full brush cages, which are a series of pipes, bars, and metal plates that are welded to the truck. This protection includes steel plates under the truck to protect the fuel tank, engine, transmission, and other vital parts. The brush protection goes around the truck and over the truck as well. In Southern and Central New Jersey, the Pine Barrens environment, which includes sandy soil, and thick under story, with Pitch Pine, Short Leaf, and Virginia Pine as the predominant trees, allow for “running down” of fires. These is where generally two trucks cut a path into the woods with the truck, and run counter clockwise around the fire while constructing control lies. This method is also used in Cape Cod area were their trucks are called Brush Breakers or Breaker for short. Similar trucks on Long Island are called Stump Jumpers, Northern Texas, Michigan, and parts of Florida.

As of May,13th, 2017, Division A operated 27 off road wildland engines, including one Type 7 and 25 type 6x engines. Of the 27 engines three do not have a brush cage. Five 2000 Ford F-350 are in service in Div. A. Two 2001 Ford F-450s are in service, one of the 2001s was former mechanic truck, a Ford F-350 was converted into a type 6x engine in 2013. Two 2002 Ford F-450 are in service, as well as two 2003 Ford F-450s. Two 2004 Ford F-450, and Three 2006 Ford F-450s, one of the 2006 Ford F-350s was an ex

mechanic truck has been converted into a fire truck, and one 2007 Ford F-450 V-10 gas are all in service. One 1986 Chevy M-1008 4x4 pickup with a slip on is in service. Two Dodge 2011(2012 model year) 3500 4x4 are in service. These units do not have the New Jersey Brush Cage, and can not push through the trees and brush. Five 2012 Dodge model year 3500 with brush cages are now in service. One 2014 Ford F-350 4x4 is in service. One 2015 Ford F-350 is in service.

Division B has in service 38 Engines and one spare. Two 1996 Dodge 3500s. Two 1999 Ford F-350, Six 2000 Ford F-350s, five 2001 (one OOS) Ford F-450s, and two 2002 Ford F-450 are in Service. In addition, there are two 2003 Ford F-450s, one 2004 Ford F-450s, two 2006 Ford F-450s (with the V10 gas engines), and three 2008 Ford F-350s with the V-10 gas engine are in the fleet. One 1986 Chevy M-1008 4x4 type 6x engine with a utility body and full brush protection is also in service. Five 2011 (2012 model year) Dodge 3500 are in service. Three 2012 Dodge 3500s are in service. Four 2014 model year Ford F-350 are in service. One 2015 Model year Ford F-350 is in service, and a 2015 Ford F-350 is under construction.

Division C currently has in service 35 engines with one spare. The break down includes one 1996 Dodge 3500s. Five 2000 Ford F-350s are in service. In 2001 six Ford F-450 were delivered, three 2002 Ford F-450s, three 2003 Ford F-450s, two 2004 Ford F-450s, Five 2006 Ford F-450s with the V10 gas engines were delivered. In 2007 one Ford F-450 V10 was delivered. In 2008 two Ford F-350 V10 gas engines were delivered, the last unit was placed into service in 2012. Five new 2012 Dodge 3500 are in service. Three 2013/14 Ford F-350 have been placed into service. Two 2015 Ford F-350 are in service. One 2001 Ford is currently awaiting reassignment(ex C24).

As of 6/1/17, the NJFFS has 101 in service Off-Road Wildland Engines. These include One 1985 Chevy M-1008 4x4 pickup type 7x with a slip on unit is in service as well as one, 1 1986 Chevy M-1008 with brush cage type 6x, 2 1996 Dodge 3500s, 18 2000 Ford F-350s, 13(one OOS) 2001 Ford F-450s, 7 2002 Ford F-450s, 7 2003 Ford F-450s, 5 2004 Ford F-450s, 9 2006 Ford F-450s V-10 gas, 1 2006 Ford F350 ex service truck, 2 2007 Ford F-350s gas V-10s, 5 2008 Ford F-350s V-10 gas. Twenty 2012 Dodge 3500 are in service, two of which do not have brush cages. And currently 7 2013/14 Ford F-350s are in service with 3 2015 Ford F-350 are in service, and three more 2015 are under construction.

In September of 2013 two brand new 2014 Model year Ford F-350's were delivered, and 7 more Ford F-350's were ordered for 2014 delivery. In The end of 2013 7 Ford F-350 were ordered! In the summer of 2014 6 more Ford F350 chassis were ordered. In April of 2015 the First new Ford F-350 was placed into service, and seven more Ford F-350 chassis were ordered in early 2015. In 2016 two Ford F-450 were ordered.

Thirteen Type four engines are in-service, three of which are 4x4s. All of the trucks usually tow a trailer with either a John Deere 350,450, or Kumstus D21 dozer/tractor plow. Each type four engine has a Hale 250 gpm engine drive pump except for one unit, which has a 750 gpm pto driven pump. Most of these units were acquired from the

Federal Excess Personal Property Program. These are the type 4 engines a 1986 International International S with a utility body and a 650-gallon tank. (Currently OOS) A 1988 GMC C70 with a Knaphide body with a 500-gallon tank. Another 1988 Ford F-800 with an old military body fitted with a 500-gallon tank. One 1988 International 4900 4x4 with an Altec body with a 500-gallon tank is in service. A 1991 Ford F-750 water tender was refurbished in 2010 with a new Knaphide body and now has an 850-gallon tank. A unique 1991 International 4900 4x4/ JC Moore Type 2 engine with a 750 pump and a 500-gallon tank, which was donated by the Lakewood NJ Fire Dept. A 1993 International 4x4 4900 chassis was used to build a type four engine in 2009. This unit has a 500-gallon tank and a Knaphide Body. Currently six type 4 engines were bought brand new by the state as type 4 engines. These include two 2003 GMC C7500 Top Kicks with a Knaphide bodies and 750 gallon tanks. Three 2005 GMC C8500 Top Kicks chassis were delivered with Kaphide bodies one with a 900-gallon tank, and two with 1000-gallon tank. In addition, Division A has a 500 gallon CAFS slip-on or skid unit that can be fitted on various chassis in Div. An including dump trucks, and or flood/storm trucks. Three 2011 FL M2-80 chassis are in service (one in Div B, two in Div C), they have 2011 Knaphide bodies with a 250 gpm pumps and 1000 gallon tanks.

Currently 8 water tenders are in service. Each water tender in service had a 250 gpm engine driven pump, and a 1200 gallon. Most have a dump valves and most carry a 1500-gallon snap-tank. One 1988 Int.S 4x4/1983Amthors is in service in Div.B. Two Military 6x6 5-ton AMG M932, one was built in built in 1983 the other is a 198? They were converted into water tenders in Div.C. Two additional Military 6x6 5-tons AMG M-932s are in service in one in Div A, one is a 1984, the other is a 1995. A 1999 International S1900 tandem axle tender with a 750 gpm pump and a 1500-gallon tank is in service in Division A. Another water tender in Div C. is a 1984 International S1900/Amthors 250/1200-gallon tender is in service. An additional Division C 1984 International S 1200-gallon tender with a utility body, is also in service. The newest tender is a 2011 Freightliner M2/ with an older rechassisd Amthors body, this unit also has a 1200-gallon tank in Division A.

Other support trucks that respond to incidents include four truck tractors for Simi-trailers including 4 low boy trailers to move heavy equipment. One 1992 Ford L 9000, and three 1997 International 8600s are all in service. Currently 5 roll back transport trucks are in service, including three 2011 Ford F-750 Millers, and one GMC C8500 Top-Kick, and one 1979 Chevy roll-back. Seven dump trucks haul tractors that carry tractor plows. These include two 2011 Freightliner M2s, a 2003 GMC C7500 Top-Kick, a 1992 International 4700, Three 1995 M932 5-ton dump trucks and a 1985 GMC C70. Several other dump trucks are available for work at the air bases and for road work. One forestry body tractor transport is in-service, which is a 1989 6x6 International 4900 with a 2001 Warren Forestry Body.

Two Helitack units are in-service which include a 2000 Dodge 3500 4x4 and a 1996 Chevy 3500 4x4. These units carry extra equipment and supplies for pro-long helicopter operations remote from air-bases. Four fuel trucks are available for av-gas for pro-long incidents as well. Six military 6x6s from the 1980's to the early 1990s are in-service as personal transport or storm response units to assist local responders.

Other vehicles include staff cars like Ford LTDs, various pick-up, and SUVs. Additional trucks such as box trucks, rack bodies, flat beds, vans, pick-up are used for logistical support of the organization both routine and at incidents.

Twenty-eight Small John Deere 350,400 or Kamatsu D21s are used regularly at fires in divisions B, C and in A7. The Larger units like the four John Deere 450s & John Deere750, Cat D4,D3 and two wide track dozers (John Deere350s) and other special tracked (Marsh Master) or off road vehicles/machines (like several ATVs) are only used as needed.

Currently the NJFFS has in service the following dozers/plows

Division A has in service 1 Tractor Plow and 3 Dozers

- 1 1978 John Deere 350 with plow
- 1 1992 Cat D4 FEED
- 1 1996 Cat D3 FEED
- 1 2010 Komatsu D21

Division B has in service 13 Tractor Plows and 2 Dozers

Tractor Plows

- 1 1977 John Deere 350
- 4 1979 John Deere 350s
- 3 1980 John Deere 350s
- 1 1981 John Deere 350
- 1 1989 John Deere 400
- 1 2001 John Deere 450
- 1 2009 John Deere 450
- 1 2010 Kamatsu D21p
- 1 2012 Kamatsu D21p

Dozers

- 1 1983 John Deere 350 Wide Track Dozer
- 1 1980 John Deere 750 Dozer

Division C has in service 14 Dozers/Tractor Plows and 1 dozer

- 7 1979 John Deere 350's
- 1 1980 John Deere 350
- 1 1981 John Deere 350
- 1 1986 John Deere 350
- 1 1989 John Deere 400
- 1 2001 John Deere 450
- 1 2009 John Deere 450
- 1 2010 Kamatsu D21p
- 1 2012 Kamatsu D21p

Dozer

- 1979 John Deere 350 Wide Track Dozer

The Brake Down by years for tractor plows are:

1 1977
1 1978
11 1979
4 1980
2 1981
1 1986
2 1989
2 2001 JD 450s
2 2009 JD 450s
2 2010 Kamatsu D21p
2 2012 Kamatsu D21p
1 2010 Kamatsu D21 no plow

The Forest Fire Service has six helicopters in service, and has three fixed wing aircraft. The state operated helicopters were all acquired via the Federal Personnel Property Program, and all still owned by the US Forest Service. The Helicopters include, Delta 1 a 1953 Bell 47G2 with a 75-gal bucket@ Coyle Field, Delta 2 a 1975 Bell 206B Jet Ranger II with a 100 gal Bambi Bucket @ Coyle, Delta 3 a 1969 Bell 206A/B Jet Ranger N103NJ@ Coyle Field, Delta 5a 1966 UH-1H Huey with a 300 gallon Bambi Bucket, Delta 6 a 1966 UH-1H Huey with a 300 gallon Bambi Bucket @Airoflex air attack base. Delta 7 a 1974 UH-1H @ Coyle Field, with a 300 gal Bambi Bucket. In addition, three fix wing aircraft are used observation, detection, and command. The fix wing aircraft include, Delta 10 a 1986 Cessna 206 5 seat, Delta 15 a 1966 Cessna 182 4 seat, and Delta 16 a 1963 Super Club a 2 seat aircraft.

In addition, the New Jersey National Guard has 6 Black Hawk Helicopters with 600 gallon Bambi Buckets if needed. The state operated aircraft are operated from two state operated air attack bases. Currently four air bases are in service by the New Jersey Forest Fire Service, one at Airoflex in Andover, Sussex County. The Main Air Base is Coyle Field in Woodland Township, Burlington County; in addition, Miller Airpark in Berkeley Township, Ocean County will be the base for the Division B contract SEAT aircraft for 2015. Downstown Airocrop Co's. airport in Downstown, is the Division C SEAT air attack base. The Forest Fire Service also operates an air strip at Strawberry Field in Hamilton Twsp., Atlantic County. Additional airports and strips are identified to be used if needed.

In addition, contract SEATs or single engine air tankers are under contract from March until May. In 2015 the contract was split between Downstown Airo Corp. and Fletcher Flying Service. Thus, in 2015 only two aircraft are under contract. Downstown still has

another 602 Air Tractor, A Turbo-Cat, and four Ag Cats available for service if need, likewise Fletcher has another 802 Air Tractor in Florida, that is available if needed.

Note Ag cats are crop dusters Bi-planes, that where built by Grumman and Schweitzer from 1959-late 1990's. Downstown Airo Crop. Is from Downstown NJ. All Downstown's AgCats are gray and yellow or all yellow with NJ Forest Fire Service decals on sides. Downstown operates a fleet of 4 600HP Agcats (300 gals), 1 Turbine Ag Cat (400 gals.), 2 AT-602 600-gallon Air Tractors built in the 2000s. In 2015 only two aircraft are under contract to the State, usually from mid March until the end of May (for 2015 mid April- end of May). In a dry spell or for large fires during other times of the year, Downstown can usually make available several AgCats throughout the year. Any aircraft can be assigned during the Spring Fire Season, and other units may be swapped out for repairs. At one point 10 contract air craft were on duty during the spring fire season. Two in Division A, 5 in Division B, and three in Division C. Two Air Tractors (A 602) from Downstown, and an 802 Air Tractor from Fletcher Flying Service are under contract for 2015.

Fletcher Flying Service is from LaBelle Florida. The currently have 5 802 Air Tractor in service, but only one on contract to NJ in 2015!

A major fire is declared when a fire reaches 100 acres, this is when additional support is provided to the Incident, such as Mobil command post, overhead support, including the Incident management team (a type 2 IC team), and fleet maintenance personnel are dispatch. All specialized units may be called on smaller incidents as needed. Including large agriculture pumps, and other specialized equipment. Helicopters can be used on smaller fire to help access remote areas, by using Bambi buckets for water drops, or airlifting equipment and firefighters to reach remote areas, as well as lighting backfires.

Major fires in Central and Southern New Jersey in the Pine Barrens areas, can be mostly contained in 24-48 hours, due to the use of mechanized attack with off road wildland engines, and tractor plows/dozers. Larger fires in the mountainous areas in Northern New Jersey, require mostly manual suppression, thus much more manpower maybe needed. Many of these type fires in Northern New Jersey can not be reached by trucks. Helicopters and or hiking and the use of hand crews are needed. These fires could take several days to contain; some times these fires can turn into campaign fires, where sleeping tents, food, and other logistical arrangements are made to support fire suppression efforts for several days or even weeks.

The urban areas of north eastern New Jersey (Hudson, most Essex, most of Union, and northern Middlesex), as well as areas along the Delaware River from Trenton south to the Salem County, as well as some other suburban and heavy agriculture areas such as the Bayshore of Monmouth County, and farming areas of Cumberland, Gloucester, and Salem counties, are not in the Primary Response area. Wildfires in these areas are handled by local fire departments, if they require help; they can call the Forest Fire Service on mutual aid, just like calling any other fire department when help is needed. All other areas of the state in the primary response area, which will receive a response from the forest fire service for wildfires, also the control of all agencies/departments working

on a wildfire incident as well as the legal responsibility for suppression is with the New Jersey Forest Fire Service in all primary response areas.

The Forest Fire Service also responds to other emergency, such as floods, storms, wilderness/missing persons' searches, aircraft crashes, snow storms, vehicle, and even structure fires in hard to reach remote areas. The Forest Fire Service also assists local law enforcement agencies, emergency managements, and Emergency Medical Services, usually in hard to reach remote areas.

The Forest Fire Service full time Forest Fire Wardens are law enforcement officers, and enforce state laws including forest fire laws, and air pollutions regulations.

FEDERAL LAND USE AGENCIES

The Federal Government has several land use agencies in New Jersey; these agencies are responsible for wildfire suppression on their property. Each agency has a cooperative agreement with the New Jersey Forest Fire Service, where all units can help each other at wildfire incidents.

The US Fish and Wildlife Service has several properties in New Jersey including:

Walkill refuge in Sussex County	5100 acres.
Supawna Refuge in Salem County	3000 acres.
The Great Swamp in Morris County	7600 acres.
The Edwin B Forsythe NWR	46,000 acres which has several units in Costal Ocean and Atlantic Counties.
The Cape May NWR	11,000 acres.

The US Fish and Wildlife Service have about 15 trained fire fighters, and currently operate 2 type 6x engines.

The National Park Service operates form several properties in New Jersey.

The Delaware Water Gap National Recreation Area's Fire Management Officer (FMO), over sees about 70,000 acres with about 50 trained fire fighters in both Pennsylvania and New Jersey side of the Delaware River. Other areas include the Edison National Historic Site in W. Orange, and Jockey Hallow (Morristown) Historic Site. In all 3 engines are in service including 3 type 6x engines. Two engines are in Pennsylvania side and one engine is on the New Jersey side.

The Gateway National Recreation Area has over 26,000 acres both in New York and New Jersey. The Sandy Hook Unit operates several structural apparatus and one wildland units.

Gateway National Recreation Area has 20 trained Wildland firefighters, 1-4 seasonal wildland firefighters, and several seasonal structure fire fighters/EMTs. The Sandy Hook unit is in Monmouth County; other units are in New York City.

Gateway currently operates three wildland engines.

MILITARY BASES

The US Military operates several Bases which have large wildland areas. These bases include;

Picatinny Arsenal in Morris County has over 6000 thousand acres of forest in a mountain terrain. A type 3x engine, as well as water tender are in service here. Fifteen fire fighters are S130-/S190 trained.

Picatinny Arsenal has several structural engines as well as one wildland unit.

T-19	2009	Int.Workstar/Pierce	1000/3000	Pumper-tender

Joint Base McGuire, Lakehurst, Dix in Burlington and Ocean Counties, is over 63 square miles of land, which includes 23,000 acres of forest in gunnery ranges The forested areas include large tracks of Pine Barrens environment. Large ranges from small arms to tanks to even helicopters provide the ignition sources for large wildfires here. The Joint base FD operates 6 type 6x engines, a type 5x engine, and a water tender. In addition, the base environmental division has one type 6x engine and a John Deere 350 Tractor Plow for prescribe burning, and wildfire use. Eighty percent of the 90 + fire fighters are S-130/S190.

Joint Base FD Sta 3 in Burlington County has structural apparatus as well as several wildland units.

CONTRACT AIRCRAFT SEATS (Single Engine Air Tankers)

Division A

Airoflex Airbase Andover Twsp. Sussex County

No contract aircraft for 2015. Delta 6 is on duty when towers are manned.

Division B

Coyle Field Air Attack Base Woodland Twsp. Burlington County No Contract Aircraft

Robert J. Miller Airpark Berkeley Township Ocean County

Bravo 1 800 gal 802 Air Tractor from Fletcher Sections all Div. B Sections

Division C

Downstown near Vineland Cumberland County.

Charley 1 600 gal 602 Air Tractor form Downstown. Sections all Div. C
Sections

In 2015 the contract was split between Downstown Airo Corp. and Fletcher Flying Service. Thus, in 2015 only two aircraft are under contract. Downstown still has another 602 Air Tractor, A Turbo-Cat, and four Ag Cats available for service if need, likewise Fletcher has another 802 Air Tractor in Florida, that is available if needed.

Note Ag cats are crop dusters Bi-planes, that where built by Grumman and Schweizer from 1959-late 1990's. Downstown Airo Crop. Is from Downstown NJ. All

Downstown's AgCats are gray and yellow or all yellow with NJ Forest Fire Service decals on sides. Downstown operates a fleet of 4 600HP Agcats (300 gals), 1 Turbine Ag Cat (400 gals.), 2 AT-602 600 gallon Air Tractors built in the 2000s. In 2015 only two aircraft are under contract to the State, usually from mid March until the end of May (for 2015 mid April- end of May). In a dry spell or for large fires during other times of the year, Downstown can usually make available several AgCats through out the year. Any aircraft can be assigned during the Spring Fire Season, and other units maybe swapped out for repairs. At one point 10 contract air craft were on duty during the spring fire season. Two in Division A, 5 in Division B, and three in Division C. Two Air Tractors (A 602) from Downstown, and a 802 Air Tractor from Fletcher Flying Service are under contract for 2016.

Fletcher Flying Service is from LaBelle Florida. The currently have 5 802 Air Tractor in servicer, but only one on contract to NJ in 2016!

The numbering system was changed in 2013! Due to the small number of aircraft on the contract, aircraft can and will be moved around for long periods of time. Also during dry spells, or high fire occurrences, may force aircraft to be temporary reassigned to a different division. The new numbering system is now this

When an Air Tractor is in any division it will be called 1 ie. Bravo 1

When the Turbo AgCat is in a division it will be called 2 ie. Charlie 2

When AgCats are in a division they will start at the number 3, then go to 4, 5, 6, ect. ie. Alpha 3 and Alpha 4

In 2016 Division A will have

Division B

Bravo 1 the Air Tractor on duty from TBD

Division C

Charlie 1 an Air Tractor on duty from TBD
